ABOUT

Software Engineering student driven by curiosity and disciplined learning, building real products independently using modern web technologies, browser APIs, and cloud backends. Focused on shipping functional applications, solving real problems, and learning through active execution and rapid prototyping.

TECHNICAL STACK

Languages: Python, Java, C, JavaScript

Frontend: React, Next.js, Tailwind CSS, Framer Motion, Three.js, React Three Fiber, HTML, CSS

Backend & Databases: MySQL, Supabase, Cloudflare, Render, Firebase

Tools: Git, GitHub, VS Code, Vite, Vercel, Netlify, AI Tools (LLM Integration / Prompt Engineering), Rainmeter

EXPERIENCE

VELOOP Rewards | Software Engineering Intern

28 August 2026 • 28 September 2026 | Live Demo

- Architected and shipped a luxury fintech-grade design system and interactive feature suite for a digital rewards and gamification platform.
- Built 5 fully interactive engagement banners and playable modal simulators featuring a native Three.js WebGL 3D reactive orb rendering at 60 FPS.
- Implemented unidirectional reactive balance state across all modals and integrated physics-based smooth scrolling via Lenis.

TECHNICAL PROJECTS

SatQuery (PrithviQ AI) | Satellite Image Q&A

Live Demo

- Developed a multimodal AI tool allowing users to upload satellite images, ask questions in plain English, and receive answers with map-based verification.
- Targeted real-world use cases including disaster response, precision agriculture, forestry monitoring, and urban planning.

Zia Personal Assistant | Hybrid AI Assistant

GitHub Repository

- Built a hybrid AI-powered voice and system assistant for Windows integrating natural language understanding with local OS automation.
- Engineered hybrid LLM routing (cloud API primary with local model fallback) to execute file operations and automated tasks.

Shadow Level | Gamified Habit Tracker

 [Live Demo](#)

- Architected a gamified daily habit-tracking application featuring interactive analytics, streaks, reward systems, and dynamic color themes.
- Designed a responsive, modern user interface utilizing React, TypeScript, and custom Tailwind CSS components.

EDUCATION

B.Tech in Computer Science and Engineering (CSE)

2025 - 2029 (Expected)

Guru Tegh Bahadur 4th Centenary Engineering College (GTB4CEC) - **CGPA: 8.59 / 10.00**
